

CMPSR: Swipe

Your Quick Start Guide

Everything you need to master the Swipe music app and create music on the go.

Note Name

Ready to Make Some Music?

01

First Play: Explore & Discover!

Launch Swipe and take the quick tour to get comfortable with your new instrument.

02

Instant Melody: Electric Piano Ready!

The Electric Piano will load up automatically, so you can dive straight into playing.

03

Swipe & Play: Your Finger's the Key!

Just glide your finger across the playing area on the screen in any direction to make those notes sing!

Unleash Your Inner Maestro with a Swipe!

Swipe Any Direction

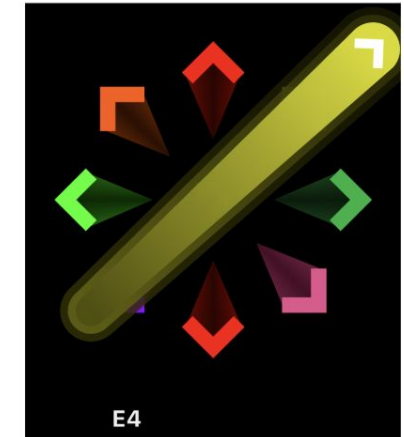

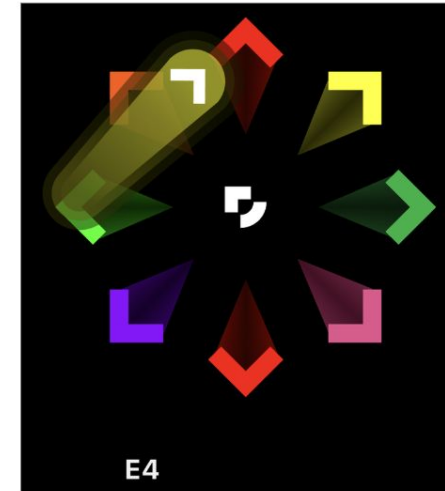

The direction you swipe is how you play a note. It doesn't matter where you start from on the screen – see the image opposite.

Speed = Dynamics

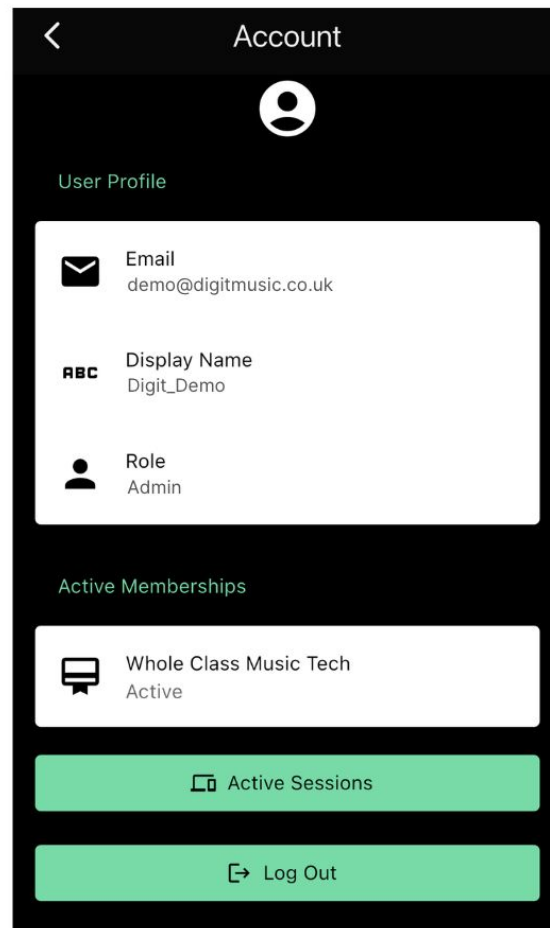

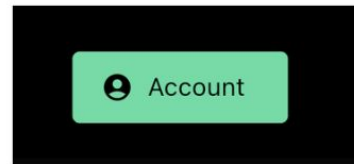

The speed you swipe will change the volume of the note – or you can turn it off in settings (described later on) so the volume is locked.

Glide Across Notes

Turn Sustain ON and glide your finger across multiple notes. They will layer up and blend to create chords.

Signup to access more instrument sounds...

 To unlock more instruments and features, head over to digitmusic.co.uk and sign up for an account. If you own CMPSR joystick controller sign up using the link provided in the welcome email.

You're SO close to the full Swipe experience! ✨

Getting an account registered is super quick and unlocks literally everything – all the awesome instruments, advanced features, and the whole playground of sound. Don't miss out on the complete musical adventure!

Unleash Your Inner Maestro: Full Musical Control!

Use the function buttons in the app to add more depth and complexity to your performance.

1. Sustain: Let It Ring!

Hold onto those beautiful notes and layer them up! Don't worry, it smartly clears for your next big chord.

2. Chords: Harmony Time!

Switch on the chord magic and unlock rich, harmonious sounds. Toggle it off for single notes!

3. Extensions: Spice It Up!

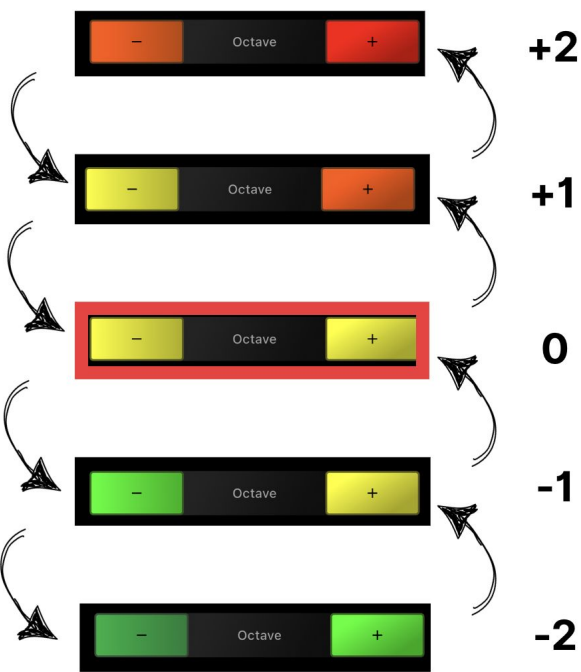

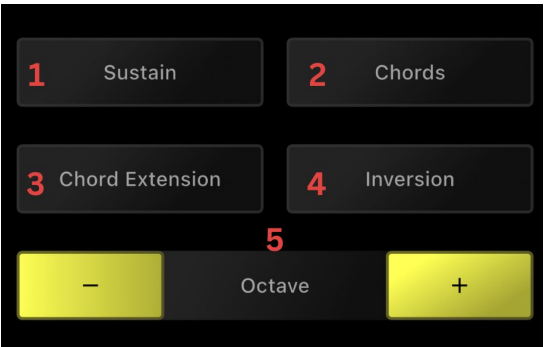

Want to sound super pro? Add jazzy 7ths, lush 9ths, and cool 4ths to make your chords truly sparkle!

4. Inversion: Flip the Script!

Rearrange your chords with a tap! Easily cycle through different voicings (like A-C-E → C-E-A → E-A-C) for fresh sounds.

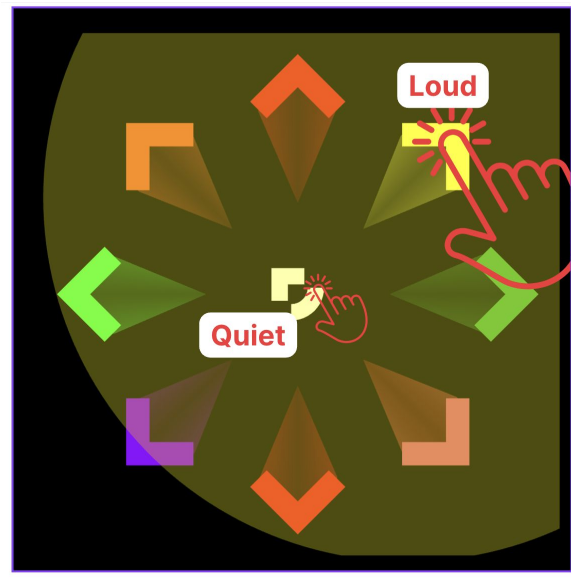

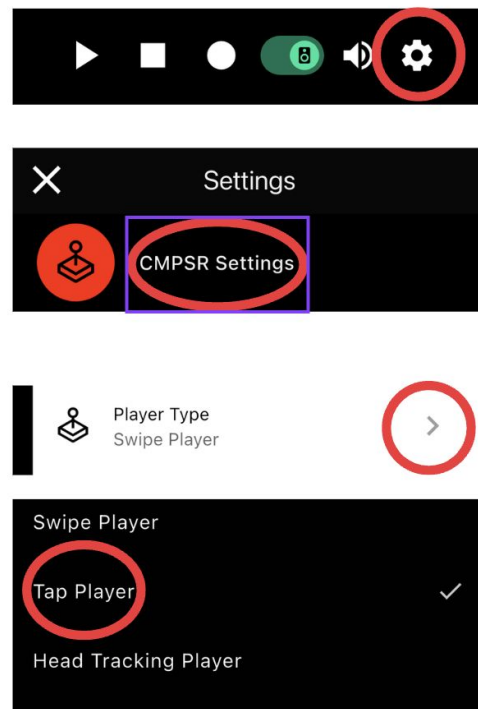

5. Octave Controls: Reach for the Stars!

Move up and down octaves to expand your range, or press to unlock accidentals. The whole keyboard is yours!

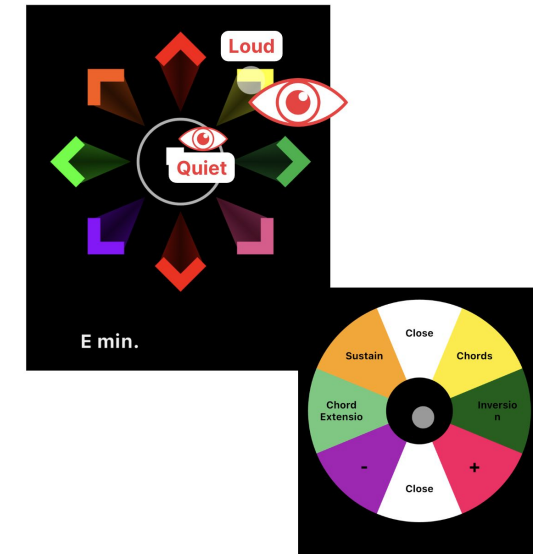

More ways to Play.

Dive into different player types
found in your Settings → CMPSR
Settings → Player Type menu:

Tap Player

Want to lay down some lightning-fast melodies? Just tap those notes directly. Control volume by how far you tap from the center – perfect for driving drum beats.

Head Tracking

Move your head to guide the cursor, then a simple blink plays your notes. No need to use your hands. Smile in the centre to access menu controls!

Ready to Rock? Let's Add Beats...

Add Backing Beats!

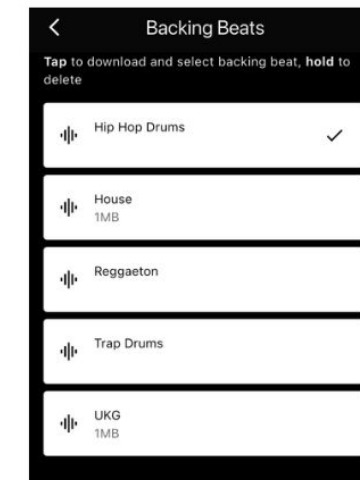

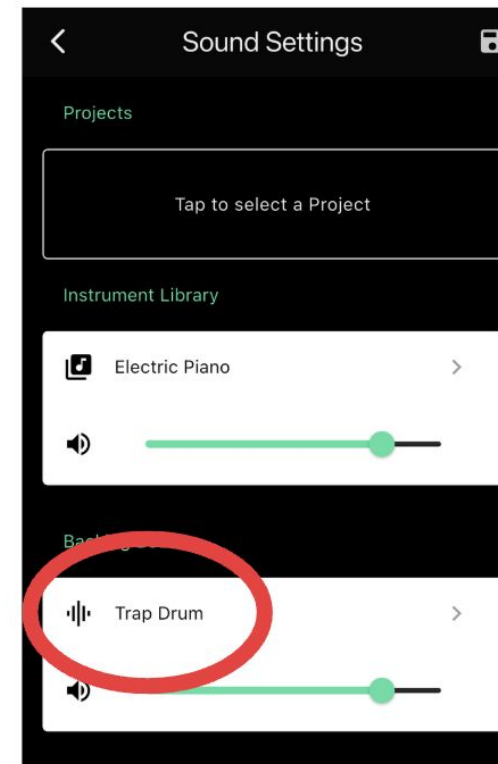

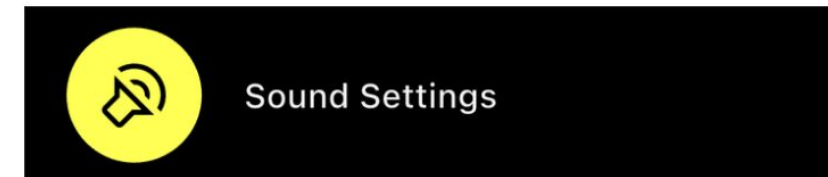

Go to Settings and then hit Sound Settings.

Tap the backing beat filename

Browse and pick your favourite beat (a little tick will appear to confirm your choice).

Ready to start the rhythm? Press the Play triangle to start the magic!

Don't forget to tweak your instrument and backing beat levels until it sounds just right! ✨

& change the instrument

A whole library of sounds

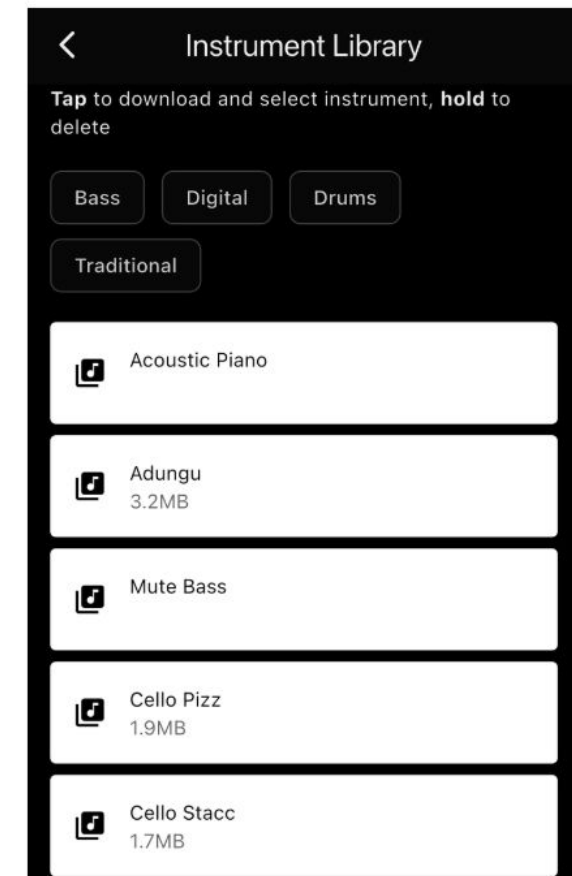

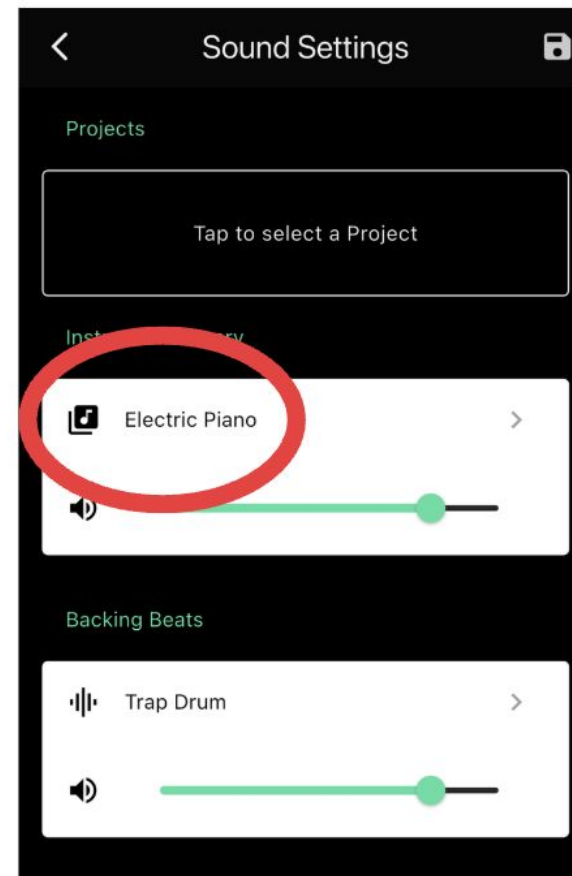

Go to Settings, then navigate to Sound Settings.

Find the instrument filename and give it a tap.

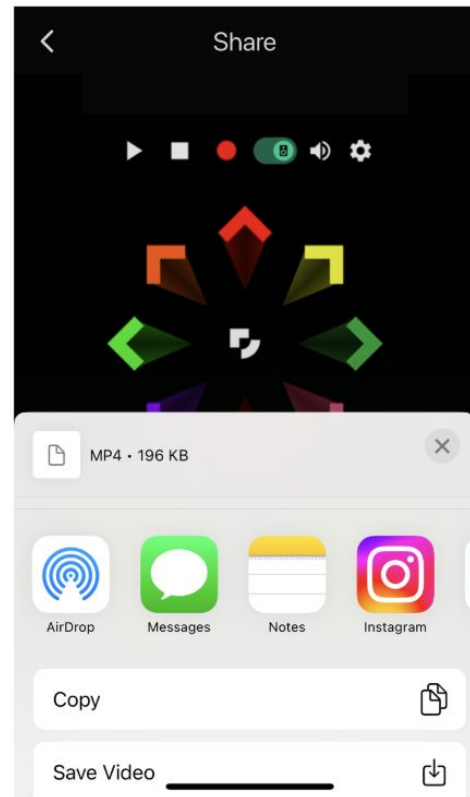

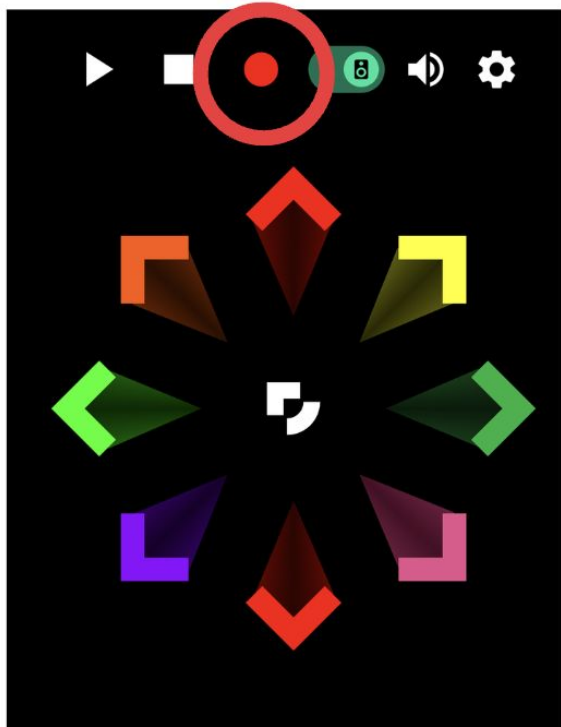

Explore our collection and select your new sound.

Once you've selected, head back to the play window and play some notes.

Sign in to access the full library of instruments. Happy exploring! 🚀

Unleash Your Creativity: Record & Share Your Tunes!

1.

Ready, Set, Record!

Tap the Record circle button to start capturing your performance!

2.

Check, 1, 2!

When it pops up, hit Allow to give Swipe permission to record your screen.

3.

Share Your Masterpiece!

Finished your jam? You can save it right to your device or share it as an MP4, complete with your visual notes!

Get Ready to Jam: Your Personal Setup!

Tune In, Jam Out!

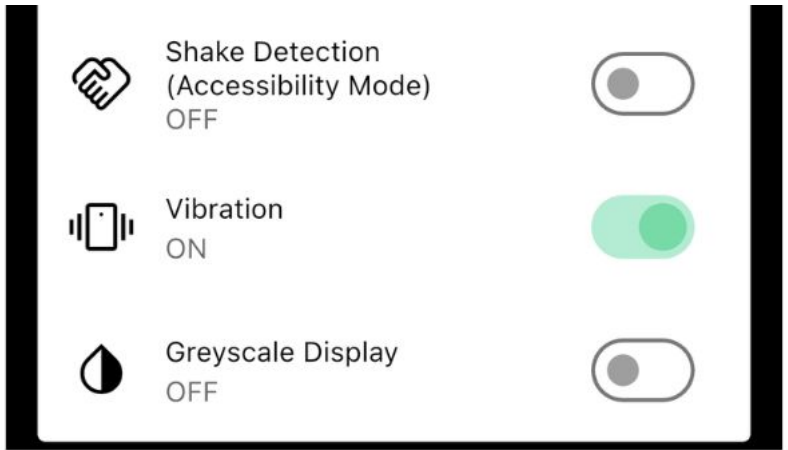

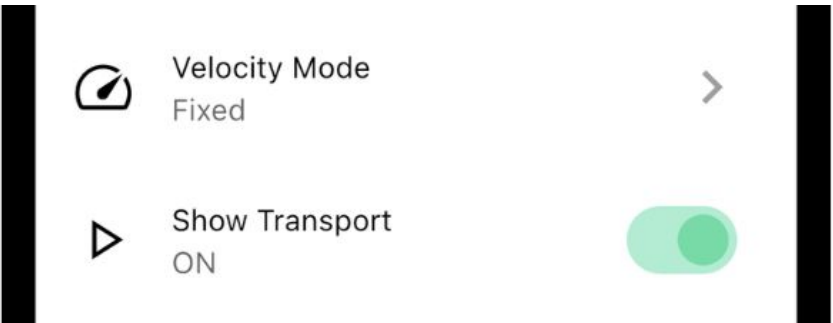

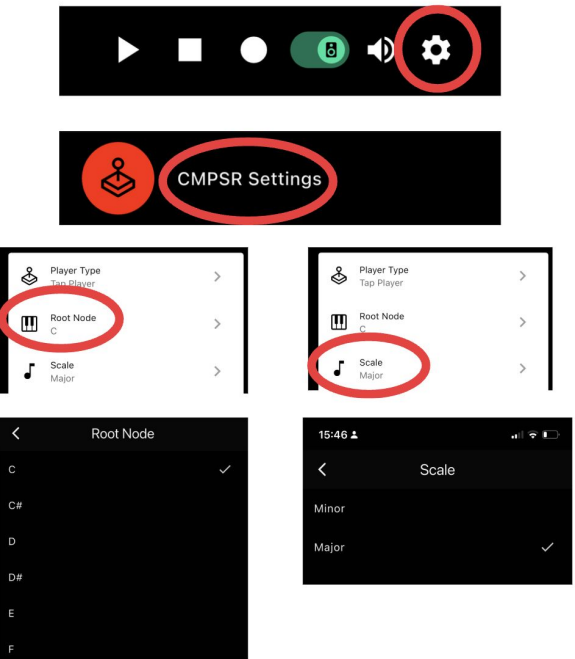

Pick your perfect Root Note and choose between Major or Natural Minor scale.

Make It Yours

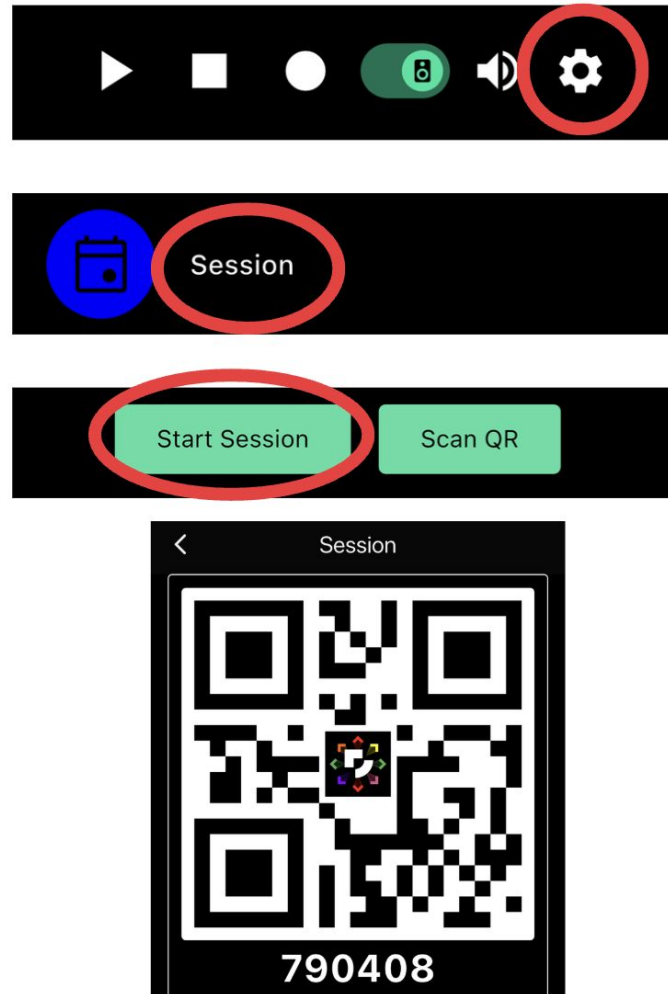

Transport Bar on or off? Prefer a Fixed volume or Dynamic? You choose! You can even remove colours if you prefer greyscale.

Inclusive Design

Screen readers get full access and you can feel the rhythm with optional haptic feedback so everyone can play.

Full Classroom Control

Using Swipe in the classroom?

Just head to Settings, select 'Session,' and hit 'Start Session. A QR code and a secret 6-digit code pop up, ready for your students to join and access all instruments and functions.

Enable every device

Connect up to 32 devices! It's perfect for a whole classroom full of budding musicians. Everyone gets access without needing to log in – super easy and quick!

Class Control

Control session names, add session notes, see who's joined class and when the lesson is over, simply end the session to disconnect everyone and free up the seats for another teacher in your school

This isn't just for classrooms – it's your customisable music playground, ready for anyone to explore and create!
